

PRODUCT DATA SHEET

DRYDENE TERRALORICA™ PLUS

BIODEGRADABLE DUST CONTROL FLUID (HIGH HUMECTANT CONTENT)

PRODUCT DESCRIPTION

DRYDENE TERRALORICA™ PLUS is a 100% biodegradable liquid designed specifically for the control of dust and airborne particulates on dirt roads, dirt race tracks, quarries and other commercial operations where dust suppression may be advantageous for cleanliness and efficiency. Terralorica Plus features a high humectant formula that works exceptionally well to control dust near the surface on most dirt track and dirt road surfaces, especially those which have retained moisture from recent rain or watering.

PRODUCT APPLICATION

DRYDENE TERRALORICA PLUS is ideal for treating dirt surfaces that retain adequate moisture or those that have been previously treated with Terralorica LHC to prepare deeper layers of dirt for optimal moisture retention. Dirt track applications benefit from a combination of LHC if conditions have been dry prior to an event, then followed with Terralorica Plus for race day water application.

- Typical dirt track: 1 gallon per 1000 - 5000 gallons of water (by water truck)
- Commercial applications on surfaces: 1 gallon per 200 - 5000 gallons of water on surfaces near stone crushers, screening operations (by sprayer)
1 gallon per 200 - 5000 gallons of water on private roads and driveways (by water truck)
- Power station application: 1 gallon per 1000 gallons of water to control coal dust and fly ash (by water truck)

Drydene Terralorica products are not tested or recommended for sensitive surfaces such as horse racing tracks, rodeo rings, sporting fields or public roadways/thoroughfares. Drydene Performance Products, Inc. disclaims any liability do to the misuse of this and any Drydene product.

TYPICAL TECHNICAL PROPERTIES

| | |
|--------------------|-------------------------|
| Appearance | Clear, slightly viscous |
| Specific gravity | 1.12 |
| Solubility | Complete in water |
| pH, 1% | 7.0 - 8.5 |
| Phosphorus content | none |
| Petroleum content | none |

This product is not expected to have any adverse health implications when used for its intended purposes. Always wear protective gloves when handling used oil and dispose of properly. Avoid contact with skin and wash immediately with soap and water should any contact occur. Always follow manufacturers recommendations for fluid viscosity and service category.
